THUB

THUB
Thesaurus de la Universitat de Barcelona

Entwickelt von: Universitat de Barcelona, Centre de Recerca per a l'Aprenentage i la Investigació (CRAI), Procés Tècnic

Sprachen: Katalanisch, mit spanischen, englischen und französischen Übersetzungen

Aktuelle Version: wird laufend aktualisiert

Themengebiete: Belles arts, Biblioteconomia i documentació, Biologia, Ciències de la Terra, Ciències econòmiques i empresarials, Relacions laborals, Ciències i tecnologia agroalimentàries: agricultura, silvicultura i zootècnia, Ciències socials: demografia, sociologia, estadística, política, Coneixement i cultura, Dret, Educació i pedagogia, Enginyeria i tecnologia, Espectacles, jocs i esports, Etnologia, Farmàcia, Filologia, Filosofia, Física, Geografia, Història, Indústria, comerç i comunicacions, Informàtica, Matemàtica, Medi ambient, Medicina, infermeria i odontologia, Psicologia, Química, Religió, Treball social i serveis socials, Noms geogràfics

Beschreibung: "Recull els registres de matèries, de noms geogràfics, i de gènere-forma, amb les formes acceptades establertes al catàleg, des de les quals podreu accedir als documents del catàleg. Els registres contenen també les formes variants i relacionades, i altres informacions que us poden ser útils, com per exemple, notes informatives, d'abast, etc. Inclou actualment més de 18.000 entrades, és una eina viva que creix i es modifica de forma continuada, i s'actualitza cada mes."

Anwendung: "Instrument en l'anàlisi documental i la recuperació de la informació per matèries del Catàleg de la Universitat de Barcelona."

Thesaurus de la UB

AHRQ

World Health Organization

Founding Reasons.

- ❖ Make traditional resources more visible
- ❖ Provide key characteristics of resources
- ❖ Encourage human assessment of these resources by applicability to semantic projects
- ❖ Promote information exchange and knowledge sharing

Hlava, Marjorie: Developing an eclectic terminology registry, 2011.

- ❖ Any kind of KOS
- ❖ Any subject area
- ❖ Any language
- ❖ Any publication format
- ❖ Any form of accessibility

Unique Selling Points.

- ❖ Wide approach
- ❖ Rich and interoperable metadata 1
- ❖ Supplementing controlled vocabularies to describe KOSs
- ❖ Linked Open Data
- ❖ Maintained by community 2
- ❖ Approved by the International Society for Knowledge Organization (ISKO)
- ❖ Visualizing KOSs 3
- ❖ Most comprehensive terminology registry for KOS & for terminology registries

Rich metadata.

Nuovo Soggettario Thesaurus

Voting results

Link: <http://thes.bncf.firenze.sbn.it/novita.php?menuR=2&menuS=2>

Abstract:

"Il Nuovo soggettario, curato dalla BNCF, è lo strumento italiano di indicizzazione per soggetto. Dopo la conclusione di una prima fase sperimentale e la pubblicazione del prototipo (gennaio 2007), il sistema è sottoposto ad evoluzione e costanti verifiche anche per garantirne un buon grado di coerenza, manutenzione e colloquio con i propri utenti. Il Thesaurus multidisciplinare viene via via incrementato tramite aggiornamenti semestrali e grazie alla partecipazione di altre istituzioni. Il formato SKOS/RDF consente il riuso dei suoi dati aperti e agevola interoperabilità con altri strumenti di indicizzazione semantica, con enciclopedie, dizionari, etc.

Gli Indici soggetti della Bibliografia nazionale italiana, a partire dai fascicoli del 2015, attivano link ai termini del Thesaurus del Nuovo soggettario.

Il Nuovo soggettario sta trovando impiego anche in contesti archivistici e museali."

English Abstract:

"Nuovo soggettario, edited by the National Central Library of Florence (Biblioteca nazionale centrale di Firenze), is a subject indexing tool for various types of information resources. It has been developed in compliance with the International Federation of Library Associations and Institutions (IFLA) recommendations and other international standards in the field of subject indexing. This tool has been created for general and specialized Italian libraries, especially those participating in the National Library Service (SBN), and for museums, multimedia libraries, archives and documentation centres. The Nuovo soggettario system has been used by the Italian National Bibliography (Bibliografia Nazionale Italiana, BNI) since 2007, and is in continual evolution."

From Basic to Full Terminology Registry.

«Terminology Registries / Repositories—may be considered at two levels: *basic* TRs contain only the metadata of KOS vocabularies, while *full* TRs contain also the members (e.g., concepts, terms, relationships) of the vocabularies.»

Golub, K., Tudhope, D., Zeng, M. L., & Žumer, M. (2014). Terminology registries for knowledge organization systems: Functionality, use, and attributes. *Journal of the Association for Information Science and Technology*, 65(9), 1901-1916.
